Subject: RE: HiTest trespass

As of today, BPA is still reviewing HiTest application for use of BPA's ROW. Thus they do not have a permit to use BPA's ROW.

Can you please confirm by reply email that HiTest still does not have a permit from BPA to access and use BPA's right of way/easement/roadway?

John,

FYI below from a landowner earlier today. This is clear-cut trespass, damaging property and interfering with her peaceful use of the same. Has BPA granted permission to them to be out there? Regardless, that doesn't excuse this activity, conducted without permission from the landowner.

Regards,

Norman Semanko

Norm this is [REDACTED], again today I had a sub contractor by the name of Budding and associates stuck in my driveway trying to get to Hitest property. Again they tore it up pretty bad trying to get unstuck. Reported as trespassing to sheriff's department. Report number 18-00-210 with officer Netter. I will be getting the report number today from when i called 2 week's ago to send you. Maybe it might be we should ask Hitest if they would like to pay to have road fixed that there subcontractors are destroying. Today they had us blocked in where we had to help to get them out so that we could make it to a appointment. Thank you [REDACTED]
