**Sensitivity:** Normal

---

Chris,

Thanks again for your time on Friday. Below is the wish list for our Silicon Smelter. If at all possible we would like to avoid Avista but as Avista serves most of the state we don't want it to limit our choices.

- 50 to 100 acres
- Rail Access prefer BNSF rail line
- Proximity to Major HWY
- 100 to 200 Megawatts of Power
- Preferable in the North East part of the State for closer proximity to our Canadian mine in Golden BC.
- Zoned as Industrial
- Reasonably Level Land
- Buffer zone of 1 mile minimum to residential areas
- 100 gpm of water available for cooling/drinking/sanitary

Thanks for all your help.

Kind regards,

John D. Carlson | Vice President
