Jaime-

I hope you are well. I've been in touch with John Carlson this morning and learned that HiTest Sand has a letter of intent for a site in Newport. I asked John to get in touch with you about putting a contract together for the state grant process. I believe there was some work done on this several months ago while the site selection process was ongoing.

I'm also copying Jaci Woodson here who can assist on our end.

Let me or Jaci know if you have any questions or if there is anything we can do to assist in the process. Thanks for all of your help.

Chris
